

MASS. RI 1.2: B 49

1998 Bilingual Students in Massachusetts Public Schools Students Whose Primary Language is not English (PLINE)

The following is the most recent data from the Department of Education which compiles statistics about bilingual elementary, middle, and high school students--or PLINE students (Primary Language is not English). As in previous years, the statistics from 1998 covering all school districts statewide continue to provide an interesting look at Massachusetts newcomer communities, highlighting dominant languages, concentrations of communities, and concentration of PLINE students.

The 1998 statistics follow similar patterns from past years, with an increase in the total number of PLINE students and, in most cases, slight increases in the dominant languages. The table below summarizes the student statistics for 1997 and 1998. The table on page two lists the 12 most frequent languages spoken, the number of students speaking the language and the PLINE percentage they represent in Massachusetts schools in 1997 and 1998. The tables on the following pages lists school districts throughout the Commonwealth whose 1998 PLINE enrollment is above 10 percent and includes the most frequent languages spoken, total PLINE enrollment and total student enrollment.

1997		1998	
Total PLINE Students Statewide	119,808	Total PLINE Students Statewide	122,891
Total Students Statewide	950,334	Total Students Statewide	963,761
Percentage PLINE Students	12.61%	Percentage PLINE Students	12.75%

COLLECTION

DEC 1998

Summary/highlights from the 1998 statistics:

- As in previous years, over half of all **PLINE** students speak Spanish; Spanish-speaking students account for 6.5 percent of the total student enrollment.
- Over twelve percent of **all** students-- about one out of eight--speak a language other than English. One out of eight **PLINE** students speaks a Southeast Asian language.
- The main concentration of PLINE students is again this year in the Greater Boston area with additional major clusters around Springfield and in Worcester, Lowell, Brockton, New Bedford, Lynn, Fall River and Lawrence.
- PLINE students account for more than half the students in Lawrence (79.39%) and Chelsea (67.06%). PLINE students account for a third or more of the students in Lowell (49.98%), Holyoke (48.33%), Somerville (42.86%), Boston (35.59%), Lynn (34.40%), Cambridge (32.8%) and Fall River (30.99%).
- In 1998, Khmer replaced Chinese as the 3rd most frequently spoken language.
- Over One hundred and ten (110) different languages and dialects are spoken throughout Massachusetts.
